

Clarusway Server Configuration

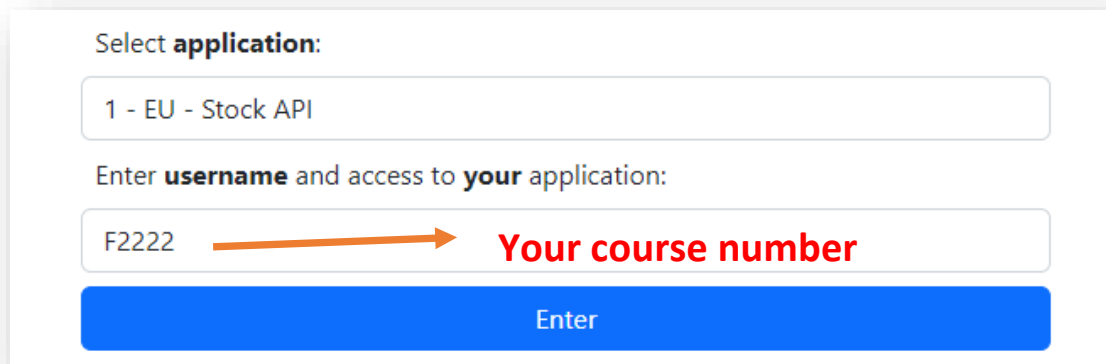

1-) Enter the following link in your browser.

<http://fullstack.clarusway.com/>

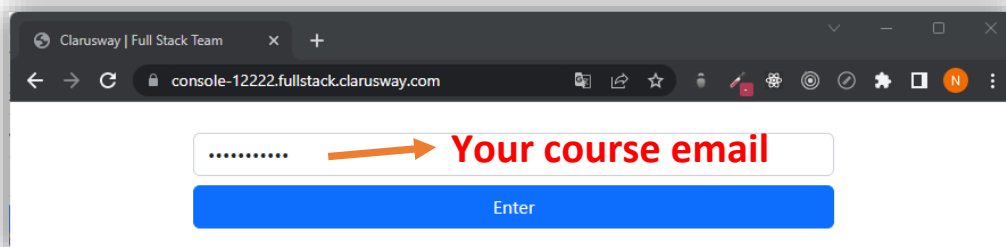

A screenshot of a web browser window showing the Clarusway Full Stack Team login page. The browser's address bar displays 'fullstack.clarusway.com'. The page has a white background with a dark header. Below the header, there is a section titled 'Select application:' followed by an empty text input field. Below this, there is a label 'Enter username and access to your application:' followed by another empty text input field containing the placeholder text 'UserCode'. At the bottom of this section is a large blue button labeled 'Enter'.

2-) Select an application from first input box and enter your course number as username then Click 'Enter' button.

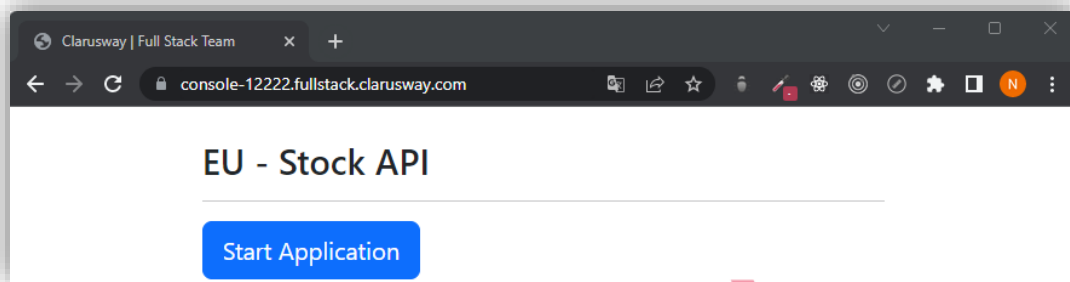

A screenshot of the same login page as above, but with data entered. The first input field now contains '1 - EU - Stock API'. The second input field contains 'F2222'. An orange arrow points from the text 'Your course number' to the 'F2222' text. The blue 'Enter' button is still at the bottom.

3-) Enter your course email as password.

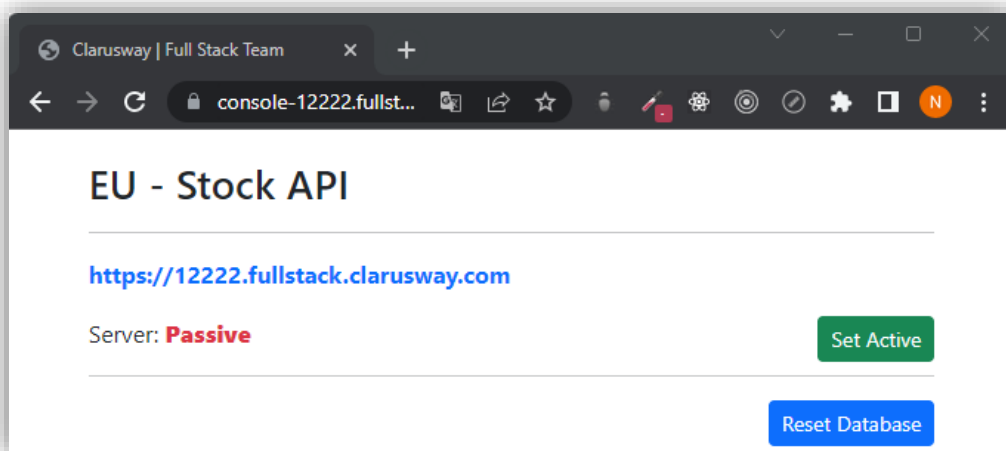

A screenshot of the login page showing the password field. The first input field remains '1 - EU - Stock API'. The second input field now contains a masked password '.....'. An orange arrow points from the text 'Your course email' to the masked password. The blue 'Enter' button is at the bottom.

4-) Start your application by Clicking 'Start Application' button

5-) Activate your backend server by Clicking 'Set Active' button

6-) Now your backend server is active. You can use following URL for fetching operation.
